PORT AUTONOME DE STRASBOURG

AN IMMENSE LOGISTICS
AND INDUSTRIAL PLATFORM
THE PORT AUTONOME DE STRASBOURG SERVING
THE DEVELOPMENT OF YOUR BUSINESS

It is on the dynamism of local companies that the development of business parks, the source of jobs and wealth, is based. The diversity of the fabric of industries and services is an important balancing factor. The simultaneous presence of industry, logistics and transport combined sustains reciprocal developments and increases the capital gain for the regional economy.

production d'acier galvanisé

EUROFRET-STRASBOURG: YOUR LOGISTICS BASE

Logistics, which play a significant role in the added value of products, is an important component in corporate competitiveness; it is entrusted increasingly frequently to service providers specialised in material and data flow management, and calls to a great extent on cutting edge techniques.

A traditional trading crossroads, the port of Strasbourg has become an immense logistics platform (600,000 m² of warehouses), where the principal European operators make their presence felt: they thus enable Alsatian companies to take advantage of their dynamism and know-how in the field of international commerce.

It is in this context that Eurofret-Strasbourg was founded, with the cooperation of the local authorities: Eurométropole Strasbourg, Département of Bas-Rhin, Région Alsace, SERS, Strasbourg Chamber of Commerce and Industry, National Association of Road Transport Centres. It is right beside the southern container terminal.

**STORAGE AND
DISTRIBUTION
PLATFORM**
served by water, rail
and road

**AN IMMENSE COLLECTION OF WAREHOUSES
AND OFFICE SPACE**
at the disposal of transport, storage
and distribution professionals

MULTIMODALITY
serving new trading prospects, particularly
